COURSES AND CERTIFICATIONS

- **Universidade Federal de São João del-Rei - UFSJ** Ouro Branco, MG, Brazil
Mechatronics, Robotics and Control and Automation Engineering (Incomplete) Jan 2018 – Jan 2021
- **Complete Java** Udemy
Duration: 33.5 hours Dec 2018
- **Go (Golang)** Udemy
Duration: 11.5 hours Mar 2022
- **Angular** Loiane Groner
Duration: 28 hours Mar 2022

EXPERIENCE

- **Netlex** Belo Horizonte, Brazil
Senior Software Engineer Nov 2025 - Present
 - **Fullstack Development:** Working on developing the Workflow functionality, a graph system that manages the entire document lifecycle.
- **Geekie** São Paulo, Brazil
Mid-level Software Engineer Dec 2023 - Oct 2025
 - **Performance Improvement:** Developed an edge cache for a legacy system overloaded with requests, boosting performance by 400%.
 - **Microservices:** Used RabbitMQ to transition from a monolithic architecture to microservices, ensuring better performance and scalability.
 - **Legacy System Upgrades:** Contributed to migration from Python 2 to Python 3, aligning systems with modern technologies.
 - **Legacy System Maintenance:** Implemented new features and fixed bugs in heavily used legacy systems.
 - **Data Migration:** Built applications to migrate data between different systems.
- **Geekie** São Paulo, Brazil
Junior Software Engineer May 2022 - Dec 2023
 - **Fullstack Development:** Developed and maintained educational applications using React, React Native, and Python.
- **PSV Engenharia de Sistemas Ltda** Ouro Branco, Brazil
Mid-level Software Engineer Dec 2021 - May 2022
 - **Fullstack Development:** Created an online resource and production control system using Angular and C#.
- **PSV Engenharia de Sistemas Ltda** Ouro Branco, Brazil
Junior Software Engineer Jan 2021 - Dec 2021
 - **Legacy System Updates:** Maintained and updated a production control system written in ASP Classic.

PROJECTS

- **AutorIA:** Developed a web system with Angular (frontend) and Python (backend) to assist students in writing better summaries.
- **NLP Research:** Participated in a university extension project studying natural language processing using Python and TensorFlow.
- **FakeBase:** Built a tool in Python that generates fake databases from user-defined schemas and simulates a backend API for interaction.

SKILLS

- **Programming Languages:** Python, JavaScript/TypeScript, C#, Java, ASP Classic
- **Technologies:** AWS, Angular, React, React Native, RabbitMQ, Next.js, Flutter, SQL, MongoDB
- **Languages:** Native Portuguese, Technical English
- **Development Practices:** Event-driven Architecture, Data Migration
